

AN EXPERIENCED TEAM

LFB BIOMANUFACTURING, a growing CDMO operating an important bioproduction facility, currently employs **62 people**, all specialists in biotechnologies and bioproduction.

The teams, all based in Alès (Southern France) are equally distributed between the GMP manufacturing areas, pilot areas and quality / quality control services. Project managers ensure proper coordination of LFB BIOMANUFACTURING's know-hows in order to meet the clients' needs and expectations.

MANAGEMENT

Roland BELIARD, Chief Executive Officer

Roland Béliard holds a PhD in Biochemistry and Cell and Molecular Biology. He has a successful track record of 25 years in the field of biotechnologies, both on research and development activities and bioproduction. He is an expert in recombinant proteins and monoclonal antibodies. He has been CEO of LFB BIOMANUFACTURING since 2012.

Marc VOUILLAMOZ, Chief Operating Officer

A biotech engineer, Marc Vouillamoz has been Chief Operating Officer of LFB BIOMANUFACTURING since 2011, after 15 years of successful track record in bioproduction and management within the pharmaceutical industry in Europe.

Jean-Charles LUNEAU, Head of Quality Unit

Holding a PhD in Kinetic Chemistry, Jean-Charles LUNEAU has over 15 years of experience in the field of biotechnologies and manufacturing of recombinant proteins, after a first successful position in research within French CEA (Atomic Energy Office).

David BALBUENA, Production Manager

A biotech engineer, David Balbuena has more than 18 years of experience in development, process development and scale up, bioproduction of recombinant medicinal products, all acquired within biopharmaceutical majors. He joined LFB BIOMANUFACTURING in 2014.
